ANNUAL REPORT

IMMIGRATION AND NATURALIZATION SERVICE
WASHINGTON, D. C.

FOR THE FISCAL YEAR ENDED JUNE 30,

1956

DEPARTMENT OF JUSTICE

UNITED STATES DEPARTMENT OF JUSTICE IMMIGRATION AND NATURALIZATION SERVICE Washington 25, D. C.

REPORT OF THE COMMISSIONER OF IMMIGRATION AND NATURALIZATION

The Attorney General United States Department of Justice

Sir: I have the honor to submit the Annual Report of the Immigration and Naturalization Service for the year ended June 30, 1956.

This report narrates our accomplishments of the past year and some of our aims for the future.

Respectfully submitted,

J. M. SWING Commissioner

Immigration and Naturalization Service

1. 2.	Immigration to the United States: 1820 to 1956	29
2-A.	June 30, 1955 and 1956	30
3.	entry: Years ended June 30, 1955 and 1956. Aliens admitted, by classes under the immigration laws: Years ended	
4.	June 30, 1952 to 1956. Immigration by country, for decades: 1820 to 1956.	- 33
5.	Immigrant aliens admitted and emigrant aliens departed, by port or district: Years ended June 30, 1952 to 1956	37
6.	Immigrant aliens admitted, by classes under the immigration laws and country or region of birth: Year ended June 30, 1956	38
6-A.	Immigrant aliens admitted, by classes under the immigration laws and country or region of last permanent residence: Year ended June 30, 1956	
6-B.	Maximum visas authorized and immigrant aliens admitted to the United States under the Refugee Relief Act of 1953: Years ended June 30, 1954 to 1956	
7.	Annual quotas and quota immigrants admitted: Years ended June 30, 1952 to 1956	42
7-A.	Quota immigrants admitted by preferences: Years ended June 30, 1954 to 1956	
8.	Immigrant aliens admitted, by country or region of birth and major occupation group: Year ended June 30, 1956.	
9.	Immigrant aliens admitted, by country or region of birth, sex, marital status, and age: Year ended June 30, 1956	
10.	Immigrant aliens admitted by race, sex, and age: Year ended June 30, 1956	46
10-A.	Immigrant aliens admitted and emigrant aliens departed, by sex, age, illiteracy and major occupation group: Years ended June 30, 1952 to 1956	
11.	Aliens and citizens admitted and departed: Years ended June 30, 1908 to 1956	48
12.	Immigrant aliens admitted and emigrant aliens departed, by State of intended future or last permanent residence: Years ended Jnne 30, 1952 to 1956.	
12-A.	Immigrant aliens admitted, by specified countries of birth and State of intended future permanent residence: Year ended June 30, 1956	
12-B.	Immigrant aliens admitted, by specified countries of birth and rural and urban area and city: Year ended June 30, 1956	52
13.	Immigrant aliens admitted and emigrant aliens departed, by country or region of last or intended future permanent residence: Years ended June 30, 1952 to 1956.	
13-A.	Immigrant aliens admitted, by country or region of birth: Years ended	
14.	June 30, 1947 to 1956	56
14-A.		
15.	Emigrant aliens departed, by country or region of birth, sex, and age: Year ended June 30, 1956	
16.	Nonimmigrant aliens admitted, by classes under the immigration laws and country or region of birth: Year ended June 30, 1956	60
17.	Nonimmigrant aliens admitted, by classes under the immigration laws	00
17 4	and country or region of last permanent residence: Year ended June 30, 1956	62
11-A.	Agricultural laborers admitted to the United States: Years ended June 30, 1950 to 1956	64

APPENDIX (Continued)

Table		$Pag\epsilon$
18.	Nonimmigrant aliens admitted and nonemigrant aliens departed, by country or region of last or intended future permanent residence:	
19.	Years ended June 30, 1952 to 1956	
20.	Aliens excluded from the United States, by cause: Years ended June 30, 1950 to 1956	67
21.	Aliens excluded, by country or region of birth and cause: Year ended June 30, 1956.	
22.	Aliens crewmen deserted at United States air and seaports, by nationality and flag of carrier: Year ended June 30, 1956.	
23.	Vessels and airplanes inspected, crewmen admitted, and stowaways arrived, by regions and districts: Year ended June 30, 1956	
24.	Aliens deported, by country to which deported and cause: Year ended June 30, 1956	72
24-A.	Aliens apprehended, aliens deported, and aliens departing voluntarily: Years ended June 30, 1892 to 1956	73
25.	Aliens deported, by country to which deported and deportation expense: Year ended June 30, 1956	74
26.	Inward movement of aliens and citizens over international land boundaries, by State and port: Year ended June 30, 1956.	75
27.	Aliens deported, by year of entry and status at entry: Year ended June 30, 1956	78
28.	Inward movement of aliens and citizens over international land boundaries: Years ended June 30, 1928 to 1956.	79
29.	Principal activities and accomplishments of immigration Border Patrol: Years ended June 30, 1947 to 1956	80
30.	Passenger travel between the United States and foreign countries, by port of arrival or departure: Year ended June 30, 1956.	81
31.	Passengers arrived in the United States from foreign countries, by country of embarkation: Year ended June 30, 1956.	83
32. 33.	Passengers departed from the United States to foreign countries, by country of debarkation: Year ended June 30, 1956.	89
34.	Aliens deported, by cause: Years ended June 30, 1908 to 1956	
35.	June 30, 1947 to 1956	98 99
36.	Aliens who reported under the Alien Address Program, by selected nationalities and States of residence: During 1956	100
37.	Declarations of intention filed, petitions for naturalization filed, and persons naturalized: Years ended June 30, 1907 to 1956.	100
38.	Persons naturalized, by general and special naturalization provisions and country or region of former allegiance: Year ended June 30, 1956	
39.	Persons naturalized, by country or region of former allegiance: Years ended June 30, 1947 to 1956.	103
40.	rersons naturalized, by country or region of former allegiance and major occupation group: Year ended June 30, 1956	106
41.	Persons naturalized and petitions for naturalization denied: Years ended June 30, 1907 to 1956	
42.	Persons naturalized, by sex and marital status, with comparative percent of total: Years ended June 30, 1948 to 1956	109
43. 44.	Persons naturalized, by sex and age: Years ended June 30, 1948 to 1956 Persons naturalized, by States and territories of residence: Years ended June 30, 1952 to 1956	110
	Aurie au. 19az to 19ab	111

45.	Persons naturalized, by specified countries of former allegiance and by rural and urban area and city: Year ended June 30, 1956 112
46.	Persons naturalized, by country or region of birth and year of entry: Year ended June 30, 1956
47.	Persons naturalized, by general and special naturalization provisions: Years ended June 30, 1952 to 1956
48.	Writs of habeas corpus in exclusion and deportation cases: Years ended June 30, 1947 to 1956
49.	Prosecutions for immigration and nationality violations: Years ended June 30, 1947 to 1956
50.	Private bills introduced and laws enacted, 75th Congress to 84th Congress:
51.	Petitions for naturalization denied, by reason: Years ended June 30, 1951 to 1956
52.	Certificates of naturalization revoked, by grounds: Years ended June 30, 1951 to 1956
53. 54.	Persons expatriated, by grounds: Years ended June 30, 1951 to 1956 120 Persons repatriated: Years ended June 30, 1951 to 1956
55.	Certificates of derivative citizenship granted, by country or region of birth: Years ended June 30, 1954 to 1956

ANNUAL REPORT OF J. M. SWING, COMMISSIONER OF IMMIGRATION AND NATURALIZATION

FOREWORD

The Immigration and Naturalization Service is responsible for the administration and enforcement of the Immigration and Nationality Act and related statutes. Its fields of work are: (1) inspection of persons applying for entry into the United States; (2) alien registration, adjustment of status and other activities relating to aliens in the United States; (3) enforcement, including control of the borders against illegal entry of aliens, seeking, taking into custody, and deporting aliens illegally in the United States; (4) naturalization and related activities; and (5) internal management.

While the fiscal year 1956 had nothing so dramatic as the drive which resulted in control of the southwest border or the mass naturalizations of 1955, it was a year of solid gains in efficiency, manpower utilization, and operation of the Service.

The successful control of the southwest border against mass illegal entries resulted in fewer apprehensions, fewer detentions, and fewer deportations than in recent years, so that the Border Patrol could fulfill its true function of preventing illegal entry, investigators could concentrate on concluding the many subversive and criminal cases, and on effecting substantial reductions in backlogs of all investigative cases.

Better use of the inspection force and improved procedures enabled the Service to examine an unprecedented number of aliens seeking admission to the United States and, at the same time, to give better public service without increasing the number of inspectors.

Following the 1955 drive, naturalization officers succeeded in placing all naturalization work on a current basis, so that petitioners for naturalization usually become citizens within a month or six weeks after they file petitions.

The operation and supervision of the Service was bettered in 1956, when 21 additional district offices were established, with greater authority for independent action and smaller areas to supervise.

INSPECTIONS

With an unprecedented 134,000,000 citizen and alien entries last year, the Service was challenged to speed up and improve inspections at the land and sea ports of the United States and, at the same time, to insure that no inadmissible aliens were permitted to enter.

A combined passenger manifest and crew-list, devised to replace the eight different manifests now in use, is the culmination of almost two years of conference and study between the Government agencies concerned and the transportation companies. The consolidated manifest has been approved by the agencies concerned and will be placed in effect as soon as approved by the Bureau of the Budget.

Aliens traveling between Honolulu and Guam are inspected at the first port of arrival for both places. With approval of the Canadian Government, Vancouver and Victoria, B.C., shortly will be added to Canadian cities where aliens departing by air for the United States are inspected before the plane takes off, rather than when it lands in the Unites States.

The waiver of passport and visa requirements was extended to all countries of the Western Hemisphere for resident aliens visiting these countries for less than six months. This is a convenience to the alien traveler, who needs only to present his alien registration card as identification, a savings in time to the Service, since reentry permits need not be issued, and, likewise, a boon to transportation companies, who no longer need to prepare individual departure documents in these cases.

Non-resident alien border crossers will soon be issued laminated cards that will be valid indefinitely. Holders of the cards will be checked periodically to determine their continued admissibility.

Each student applying for admission to the United States must now present to the consular office a document from the school he expects to attend, certifying that the student has been accepted, and that the school is an approved place of study for foreign students. Thus, the school, from the beginning, accepts responsibility for the student and for obtaining certification. The cumbersome and-time consuming task of publishing lists of acceptable schools for consular offices is no longer necessary.

A number of the Service offices are several miles back from the Canadian Border. Until the new building program can be completed, signs are being placed on all roads leading out of Canada, directing aliens to the nearest station. Close cooperation is maintained with Canadian immigration officers. In some places serially numbered cards are given aliens by the Canadian authorities, to be turned in at the United States offices. These steps have improved the inspection coverage at designited ports of entry for inspection.

Admissions

An expanding economy, improved transportation facilities, and the encouragement of travel to promote international understanding, all contributed to a heavy workload for immigrant inspectors.

Admissions at land, sea, and air ports reached the all-time high of 63,024,943 citizens and 71,115,577 aliens. As in past years, 97 percent of all entries were repeated alien and citizen border crossings.

Citizens. While immigration inspection deals for the most part with the admissibility of aliens, citizens, too, must be examined to determine that they are citizens and, therefore, admissible. In addition to the citizen border crossers, 1,281,110 citizens returned to the United States at sea and air ports. Traffic was about evenly divided between Europe and the vacation spots in the Caribbean.

Immigrants. Not since 1927 have so many immigrants been admitted to the United States as in 1956, when there were 321,625. Factors that raised immigration 35 percent over last year were the refugees admitted under the Refugee Relief Act of 1953, and a 32 percent increase in the number of natives of Western Hemisphere countries. Since both of these groups are nonquota, they contributed to the highest nonquota immigration (232,315) since the passage of the Immigration Act of 1924.

As Mexican illegal entries were stopped, legal admissions increased. For the third consecutive year Mexico was the chief source of immigration, with 65,047 admissions in the past year. Canada, with 29,533 admissions, and the West Indies with 19,022, also showed increases.

Under the Refugee Relief Act of 1953, which expires on December 31, 1956, 209,000 visas were authorized for refugees and relatives of citizens or alien residents of the United States. By June 30, a total of 104,803 refugees and relatives had been admitted, including 74,980 admitted in fiscal 1956.

Citizens, both military and civilian, stationed abroad influenced the third largest class of nonquota immigrants. Of the 31,742 wives, husbands, and children admitted as nonquota immigrants, 7,460 came from Germany, 4,484 from Italy, and 4,226 from Japan.

In addition to those immigrants who were admitted outside the quota provisions of the Immigration and Nationality Act, 89,310 quota immigrants, chiefly from Europe, were charged to the established quotas of 154,657. While quota immigration was nine percent higher than last year, it was still only 58 percent of authorized quotas.

The continued effect of the mortgaging of quotas by the southern and eastern European countries under the Displaced Persons Act, and the fact that higher quotas for United Kingdom and Ireland are not used, are principal reasons for quotas not being filled.

Visa Petitions. A total of 72,547 visa petitions were approved for quota preference and for nonquota status. 59,634 petitions were approved for close relatives of United States citizens.

Petitions for first preference quota visas for persons of special skills and ability still remain low; with 50 percent, or 77,328, quota numbers available for use, only 4,427 such petitions were received and only 3,366 immigrants were admitted first preference.

Nonimmigrants and Resident Aliens. These figures are exclusive of crewmen, agricultural laborers, or border crossers. In this year of record-breaking admissions, an all-time high of 686,259 nonimmigrants were admitted. The 399,704 visitors for pleasure brought about most of the increase over last year. Returning residents, exclusive of those for whom documents were waived, totaled 52,136.

Agricultural laborers. Another record was reached with the admission of 431,985 agricultural workers to the United States. Included in this total were 416,833 Mexican nationals, known as "braceros," (an increase of 23 percent over 1955), 7,210 Canadian workers, 7,911 from the British West Indies, and 31 from the French West Indies.

To speed the processing of employed Mexican workers, those who have been security screened and who have fulfilled their contractual obligations are given laminated identification cards (micas) upon their departure from the United States.

A program of recruitment and control of British Virgin Islands workers entering the American Virgin Islands, similar to that used on the Mexican Border, insures adequate supply of competent workers in that area.

Interested agencies and organizations are planning a program for the importation of agricultural workers from Japan.

Crewmen. Crewmen admissions were nine percent higher in the fiscal year 1956 than in 1955. During the year, 1,533,249 alien and 920,088 citizen crewmen were examined and admitted.

Desertions numbered 2,968. Greek crewmen deserting, chiefly from Liberian and Panamanian vessels, increased by 70 percent from 491 in 1955 to 837 in fiscal 1956. Other large groups were 313 British, 448 Italian, 162 Norwegian, and 247 Spanish.

Admission of Otherwise Inadmissible Aliens. The Immigration and Nationality Act provides that, under certain conditions, grounds of inadmissibility may be waived by the Attorney General for the temporary admission of aliens where extenuating circumstances exist. In each case where a security or moral ground of inadmissibility is waived, a report must be made to Congress. During this fiscal year there were 561 cases reported to Congress in which such grounds of inadmissibility were waived.

Aliens who are excludibles because of their former membership in proscribed organizations may be admitted to the United States if it is found that they have been actively opposed to Communism during at least five years prior to their application for visas. A report must be submitted to Congress in each case in which an alien is found to be a defector. During this fiscal year there were 76 such reports submitted to Congress.

Exclusions

Exclusion Hearings. Despite the over-all increase in international travel, the Service conducted fewer exclusion hearings than in any of the previous years within the past decade, 5,392 hearings in 1956 as compared with 10,467 in 1955 and 13,254 in 1954. This downward trend is the result of the Service policy that requires supervisory officers in the field to resolve as many cases of technical inadmissibility as possible through review action or by the exercise of discretionary powers.

Exclusions. Final exclusions totaling 1,709 were the lowest since 1944, when admissions were but a seventh of the present number. As in prior years, many aliens were excluded because of attempted entries without proper documents, but waivers of documentary requirements account for some of the decline in exclusions on this ground. Through preinspections and preexaminations many excludable aliens are weeded out before arrival in this country. Exclusions included 117 subversive and 238 in the criminal, immoral, and narcotic categories.

In addition to aliens formally excluded, 168,811 aliens who appled for admission were not admitted. Included in this group were many aliens applying at land border ports who, when advised that they did not appear to be eligible for admission, elected to return to their homes rather than appear for a hearing before a Special Inquiry Officer.

Detention and Parole of Applicants for Admission. Since November 1954 only those aliens likely to abscond and those whose release would be inimical to the security of the United States are held in detention. Detention of excludable aliens, which had averaged close to 225 monthly prior to the new program, dropped to a monthly average of less than 40. Documented applicants for admission at seaports who have purely technical difficulties are permitted to go to their final destinations, where hearings are held and final decisions made. At land border ports aliens are returned to Canada or Mexico immediately, pending Special Inquiry hearing, if necessary, at a later date.

ALIENS IN THE UNITED STATES

2,622,462 aliens reported their addresses in January of 1956 in compliance with the requirements of the Immigration and Nationality Act. This was a gain of more than 100,000 over the preceding five years, and was the result of better publicity and high immigration.

There were some interesting contrasts with reports of 1954. For example, 337,730 nationals of Mexico reported in 1954, and 424,325 in 1956. In 1954, a total of 489,937 Canadians and British reported, in 1956 the figure was 505,729. On the other hand, only 187,888 nationals of Poland reported in 1956. In 1954 the figure was 231,890. Similarly, there were 76,089 nationals of U.S.S.R. who reported in 1956. In 1954 there were 116,960. The rapid naturalization of displaced persons and low immigration from these countries account for much of this reduction.

Adjustment of Status

No law affecting the lives of human beings can cover all contingencies, nor eliminate all hardships. The Immigration and Nationality Act and special legislation for specific groups have provided certain areas wherein adjustments can be made.

Preexamination. A procedure whereby an alien in the United

States may be examined to determine eligibility for admission as an immigrant was reinstated in May 1955, with the approval of Congress. If found eligible, and if a visa is available, the applicant may go to Canada, obtain his visa at an American Consulate, and upon return to the United States be admitted as an immigrant. Aliens, to be eligible, must have entered the United States prior to January 1, 1956. 2,366 applications were approved during the year and 149 denied.

Section 6, Refugee Relief Act. Section 6 of the Refugee Relief Act provided that 5,000 persons could adjust their status under that Act. As of June 30, 1956, 4,777 applications had been approved and forwarded to Congress for consideration. If approved by Congress, permanent resident status will be conferred on the applicant. Efforts are being made to complete the pending applications during the next fiscal year.

Section 4, Displaced Persons Act. During the fiscal year just completed, 155 applications for adjustment of status under section 4 of the Displaced Persons Act of 1948 were approved and submitted to Congress. This practically wipes out the remainder of such applications which were filed prior to the closing date of June 16, 1952. Of the 15,000 applications for adjustment which might have been granted under the provisions of Section 4 of the Displaced Persons Act, a total of 5,503 have been approved by Congress.

Suspension of Deportation. The Attorney General is authorized under the Immigration and Nationality Act to suspend the deportation of an alien and to adjust his status to that of an alien lawfully admitted for permanent residence, under certain conditions. Similar authority existed under the prior immigration law.

1,021 applications for suspension of deportation were approved and submitted to Congress. Congress approved 1,088 applications during the year, and the alien's status was adjusted to that of permanent resident. In most of these cases the deportable alien has led an exemplary life in the United States for a long time. Frequently, deportation would cause extreme hardship for a citizen spouse and children.

Other Adjustment of Status. Applications for change of status from nonimmigrant to immigrant continued to be relatively high during this fiscal year. There were 4,226 applications adjudicated, with 3,702 granted and 524 denied for various reasons. There were 68 aliens whose status was changed from that of immigrant to non-

immigrant in connection with employment with foreign governments.

When a record of entry for permanent residence cannot be located for an alien who entered prior to July 1, 1924, the Act provides that such a record may be created. During the fiscal year there were 8,438 applications for such adjustment granted. The backlog of such cases, which was 4,742 on June 30, 1955, has been further reduced to 1,085 such applications pending.

ENFORCEMENT

The programs of enforcement fall into three general groups: (1) the prevention of illegal entries, (2) the investigation of aliens illegally in the United States, and (3) the development of intelligence information.

Prevention of Illegal Entries

Prevention of Illegal Entries. Enforcement begins with guarding the border against illegal entry and apprehending and expelling those who, in spite of our diligent efforts, manage unauthorized entries. The decade in which "wetbacks," in ever-increasing numbers, crossed the Mexican Border, was brought to an end with the "Operation Wetback" that began in June 1954. The excellent progress made in effective control is demonstrated by the reduction in number of apprehensions—90,122 in 1956, from 256,290 in 1955 and 1,096,619 in 1954.

Land Border Security Operations. When there were no longer any mass movements of aliens across our southern border, the mere checking of farms and communities along the border was not enough. Many aliens now entering illegally are criminals or other aliens whose past experience in evading the law makes detection and apprehension more difficult. A higher proportion are assisted by smugglers. These are not the simple Mexican laborers bent on working on farms on the United States side of the Rio Grande. In fact, fully a fifth of those apprehended at present are of nationalities other than Mexican.

Direction of operational activities of the Border Patrol was placed under the regional offices. This enables better coordination of activities between the sectors and speeds up movements of officers and equipment to meet changing conditions and workloads.

The deployment of task forces further into the interior was

another method used during the past year. 6,457 Mexican aliens were apprehended working in industries, thus releasing an equal number of jobs for citizens or resident aliens.

During the year 10 airplanes were seized for illegal entry and 6 additional planes were seized by Mexican authorities as a result of air intelligence activities.

The improved situation along the southern border permitted the strengthening of the officer force in all other areas toward the end of the year. At the Canadian Border, which extends more than 4,000 miles, a wider deployment of officers and transportation and communications equipment was made possible. Electronic warning devices are employed on certain roads and railroads where illegal crossings occur.

Steps were taken in cooperation with Canadian authorities to divert traffic away from roads without inspection facilities and channel it through established ports of entry. Friendly contacts with inhabitants of rural areas often enable patrol officers to trace the progress of suspects illegally entering, by means of telephone reports from farm homes in the area. Such information is then relayed by radio to the nearest patrol unit for appropriate interceptive action.

All Border Patrol officers were designated as Customs Patrol Inspectors during this year. Statutory authority was thereby conferred upon our officers to make arrests and seizures for violations of the customs laws. Without cost and with no loss of effective immigration law enforcement, material gain in over-all border law enforcement has resulted. In fiscal 1956 the value of all seizures was estimated at \$683,000.

Anti-Smuggling and Stowaway Operations. Investigation uncovered two instances where seamen were smuggling aliens into the United States by assisting them to stow away. One of these involved the SS CRISTOFORO COLOMBO, flagship of the Italian fleet. In this case fifteen persons were prosecuted, two as smugglers, six for smuggling into the United States as stowaways, and seven for transporting and harboring the aliens after illegal entries. In the other case a seaman who assisted aliens to stow away on the SS CIUDAD DE BARQUISIMETO was prosecuted and sentenced to one year imprisonment. Four aliens whom he assisted to enter as stowaways were also prosecuted.

The proximity of Cuba to numerous abandoned airfields in the United States presents easy opportunities for smuggling. To com-

bat the smuggling and illegal entry of aliens by air or by sea, the Border Patrol utilizes 18 patrol boats based at strategic points, whose operations are closely coordinated with air patrol.

Seven hundred sixty-five smugglers of aliens were apprehended in fiscal 1956, a reduction of 18 percent from the previous year. Convictions were obtained in 216 smuggling cases involving 890 aliens. 256 stowaways were found on the carriers inspected.

Investigation of Aliens Illegally in the United States

A major function of the Service is to locate aliens who entered the United States illegally or who have become deportable after entry. Where a case warrants it, an active investigation is initiated to develop facts leading to the institution of proceedings against such aliens.

On July 1, 1955, revised operational reporting procedures, designed to insure accurate reporting of investigations workloads and accomplishments, became effective. Many routine matters are no longer carried as investigative cases. Although investigations may be conducted in various cities concerning one individual, the net result is reported as a single investigation. Under this system the number of investigative cases reported is much smaller than in previous years. In conjunction with the new reporting procedures, a uniform case control system on investigative cases was installed in each office.

With the realignment of the investigative force effective in January 1956, efforts were turned to the filling of investigator position vacancies and the reduction of pending caseloads which had risen from a pending figure of 27,262 on July 1, 1955, to 31,058 on January 31, 1956.

Document Control. Departures of nonimmigrants are verified upon expiration of their authorized stay in this country by matching the document turned in on departure with an arrival document. During the past year about 70,000 overstay cases were referred for investigation. This is a major source of information in the investigation, apprehension, and expulsion of aliens who remain in the United States beyond their authorized time.

Investigative Searches. Another source of information is the investigative search program, whereby search is made of likely places for aliens in illegal status. Early detection and expulsion of the recently arrived illegal alien serves not only as a deterrent to others who seek to enter illegally, but eliminates later unpro-

ductive investigation when the alien may have acquired equities entitling him to discretionary relief from deportation.

An adjunct to the investigative search program is the development of liaison with penal and mental institutions. Cooperation between these institutions and the Service and a continued flow of information from them will decrease the time required of investigators in screening patients and inmates. It will also reduce the financial burden on the various States by expediting the deportation of aliens being treated at public expense.

Anti-Subversive Operations. Efforts to reduce arrearages in subversive cases resulted in a decrease from 14,852 cases pending on July 1, 1955, to 9,520 at the end of the fiscal year. A primary goal for fiscal 1957 is the attainment of a current status in subversive investigations, and every resource available to achieve this end will be used.

In addition to the subversives deported as a result of investigations and reported under "Deportations," were other cases brought to a successful conclusion, such as: Two employees of a pro-Communist Chinese newspaper in this country were arrested and placed under deportation proceedings; or the case of a 59-year-old native of Poland which was referred to the Attorney General with recommendation that proceedings be instituted to cancel his naturalization. He was an important member of the Communist Party and the national vice president of an organization affiliated with the Party.

4,164 investigations were conducted in regard to citizens who obtained naturalization fraudulently, involving possible revocation of citizenship. 15 denaturalization suits were instituted during the year, of which three involved subversive classes.

During 1956, there were 95 Mexican aliens excluded from admission because of subversive activity or affiliations. This was the result of an effectively integrated program of all branches of the Service designed to prevent the entry of subversive aliens from Mexico.

Anti-Criminal Operations. Close attention was given to the denaturalization and deportation of persons of the criminal, immoral, and narcotic classes. During the year, 3,838 such cases were completed and the cases were in the deportation process.

Visa Fraud and False Document Operations. During the past year, evidence of increased fraudulent document activity was uncovered, principally in Mexico and Cuba. The modus operandi of these rings was to obtain documents for the use of aliens in support of their applications for immigration visas at the various consulates in Mexico and Cuba. The Service investigation of these activities resulted in criminal proceedings against 37 individuals.

Special arrangements were entered into whereby Service investigators worked closely with United States Attorneys in New York and San Francisco in the investigation of Chinese cases. In the New York District, numerous confessions of Chinese have been obtained which revealed that there existed a lucrative racket in the sale of "slots," or positions on the family tree, which were used to assist Chinese to enter the United States posing illegally as citizens. Persons in the United States have acted as brokers, buying and selling "slots" and notarizing fraudulent affidavits which were used to establish the false claims to United States citizenship.

Thirteen persons, including four who were engaged in this racket as a regular business, have been indicted by the Federal Grand Jury in New York. Approximately 24 who were successful in gaining entry into the United States have been found amenable to deportation as a result of this investigation. The investigation is continuing.

Prevention of Illegal Entries through Coastal Areas. As manpower becomes available, more emphasis will be placed on investigative port activities, in order to detect stowaways, smugglers, and deserting crewmen before they leave the area in which they arrive. The desertion of alien crewmen of the subversive and criminal classes, particularly Chinese, is one of the primary concerns of the Service at this time.

Intelligence

While there has been intelligence work done, and there have been intelligence units in the operating divisions, there was not, until October 1955, a staff office to plan a program to develop, coordinate, and make available to the various operating divisions all useful information.

The Intelligence Branch is the primary liaison for the Service with the Federal Bureau of Investigation, Central Intelligence Agency, and other Government agencies at the seat of Government, without disturbing existing liaison channels, and it is charged with improving intelligence liaison with other agencies. The branch also coordinates special projects where Service interest embraces more than one operating division.

Intelligence channels have been set up in each operational division in the regional offices, district headquarters, suboffices, and Border Patrol sectors. The responsibilities of developing, collecting, and disseminating information of intelligence value have been assigned to designated officers in the several divisions at all levels. Procedures have been adopted to facilitate the flow of intelligence direct from the collecting field office to the office or offices which best can take action, without following official channels.

Matters of more than local significance are reported, through intelligence channels, to the regional and Central Offices. The recognition and freer exchange of useful information has contributed materially to Service operations. Intelligence reports have aided in determining work areas where additional effort should be made.

In the Border Patrol operation, surveys of conditions affecting alien movements and a rapid interchange of information between sectors were part of the intelligence program. An air intelligence center for tracking planes illegally entering the United States was established in June of 1955.

In investigations work, the development of informants and the intelligence gained is of increasing benefit, both in the development of cases and in the investigative search operation.

Detention and Parole

When, almost two years ago, it was determined that most aliens did not need to be placed in detention in order that they be available for deportation, the number of aliens in detention dropped overnight from thousands to hundreds. At that time the policy established was that only those aliens whose freedom would endanger the public safety or security, or who were considered likely to abscond, should be detained.

During the past year there were only 145 aliens in detention per day, exclusive of those Mexicans held in the staging areas for transportation to Central Mexico.

The Service was thus able to close the detention facility at Detroit, Michigan, and plans were perfected to curtail operations at the Chula Vista, California, facility. A small part of the latter facility will be utilized as a staging area to process Mexican voluntary departures. Most of the facility will be placed on a standby basis.

When the detention policy proved feasible, it was determined that frequent reporting to the Service by aliens on bond, parole, or supervision also was not necessary in most cases. Thus, the large majority of aliens released on conditional parole, conditional bond, or under supervision, report in writing once each year instead of reporting in person at periodic intervals to Service offices. During the year 11,179 aliens were released on conditional parole, under bond, or supervision. At the end of the year there were only 2,214 reporting in person of the 10,686 under bond, parole, or supervision.

Deportations

Deportations numbered 7,297 in the fiscal year 1956, less than half of the 15,028 deportations in the preceding year. Included in the 1956 figures were 16 aliens deported on subversive grounds, 818 deported on criminal, immoral, or narcotic charges, and 6,463 others. In addition, 80,891, principally Mexican illegal entrants, were granted voluntary departure.

Among subversives expelled from the United States during the year were Cedric Belfrage, a national Communist functionary and editor of the publication NATIONAL GUARDIAN; and Claudia Jones, a Communist official at national level, who had been convicted under the Smith Act. Sam Sweet, a prominent Communist in the Detroit area, and Morris Ginn, an instructor in Communist Party schools in the Philadelphia area, were placed under final orders of deportation.

Included among those deported on criminal, immoral, or narcotic grounds were Joseph Accardi, a New Jersey racketeer; Nicolo Impostato, long known and prominent in narcotic activities in the Kansas City area; Giuseppe Gagliano, a narcotics peddler; Salvatore Maneri, a Brooklyn racketeer who had been convicted in absentia in Italy for murder; Joseph Doto, also known as Joe Adonis, racketeer kingpin in the New York City and northern New Jersey area; Angelo Macri, wanted for murder in Italy; and Sebastiano Vermiglio, narcotics trafficker who was apprehended in Chicago after he had absconded.

Order to Show Cause Procedure. Curtailment of detentions proved that only a very few aliens needed to be detained or to be forced to report frequently while on parole, bond, or supervision. In February 1956 the Service instituted changes in its regulations which were designed to take account of this factor, and to make deportation proceedings as fair and effective as possible. Deportation proceedings are now commenced by the issuance of an order

to show cause rather than by the issuance of a warrant of arrest.

The order to show cause sets forth numbered factual allegations as well as the deportation charge. The show cause order also contains notice to the alien of the date and place of hearing, and advises him of his right to counsel.

Under this procedure, warrants of arrest were issued and served in approximately 25 percent of the cases in which custody of the alien is considered necessary as a security measure, or in which the alien is likely to abscond. Thus, most aliens placed under deportation proceedings do not suffer the stigma of arrest and are not detained or placed under bond, supervision, or parole.

The policy of granting voluntary departure whenever possible prior to the issuance of an order to show cause, or subsequent thereto but prior to an administrative hearing, will be continued during the coming year. Formal deportation cases will be held to a minimum, with resultant savings in time and effort.

Deportation Hearings. Special Inquiry Officers are now completely insulated from control or supervision by officers with enforcement or investigative responsibilities. Through a change in organization they were placed under the immediate direction of the Regional Special Inquiry Officers, who, in turn, were made reponsible solely to the Chief Special Inquiry Officer in the Central Office.

A change made in the hearing regulations permits the alien to plead to the matter of his deportability. If the alien admits that he is deportable as charged in the order to show cause, the Special Inquiry Officer is authorized to determine by the alien's admissions that deportability has been established. The "pleading" process thus affords a practical and economical method for resolving deportability without the need for extended hearings in the numerous cases where the issues are simple and the alien does not desire to dispute the charge.

In 80 percent of the cases heard, the alien conceded his deportability and left only the issue of discretionary relief to be heard by the Special Inquiry Officers.

In cases where the alien does not concede, or questions any aspect of his deportability under the show cause order, he receives a full scale hearing at which an examing officer, as prosecutor, is assigned to present the Government's evidence. This relieves the Special Inquiry Officer from the necessity of offering evidence in support of the deportation charges, and has left him completely

free to perform the duties of an adjudicating officer. Obviously, this makes for greater fairness to all concerned.

Stay of Deportation—Physical Persecution. There were 815 orders pending as of June 30 which could not be executed because the aliens claimed that to be deported to the country of birth would subject them to physical persecution. Under section 243(h) of the Immigration and Nationality Act, an alien may make such claim, which, if sustained, will prevent his deportation to the country designated.

While many requests for stays of deportation were submitted by aliens who sincerely believed they would be physically persecuted if deported to certain countries, the majority used the statute as a means to delay deportation. The Service is paricularly concerned with the increasing number of deserting crewmen who file 243(h) applications solely to defeat or delay deportation. The determination of these cases requires careful study of world conditions by Service officers.

Of the 1,493 applications under section 243(h) received, 629 cases were completed, of which 159 were denied.

Boatlift. While Mexican alien apprehensions decreased, the need for rapid return to Mexico of those apprehended continued. Many Mexican nationals were repatriated to Mexico on vessels which, with the cooperation of the Mexican Government, operated between Port Isabel, Texas, and Veracruz, Mexico.

Frequent trips resulted in a substantial decrease in the number of days detention per alien in the McAllen Detention Facility, and allowed for the more rapid movement of aliens from other staging facilities at Chula Vista, El Centro, and El Paso.

Airlift. The removal by chartered aircraft and Service-operated planes of deportable aliens confined in hospitals and mental instititions continued during 1956. 153 mentally and physically infirm aliens were delivered to a number of countries in Europe, North Africa, and Asia, and 64 to the Caribbean, Central and South American ports. The airlift is the most humane and practical means of returning these aliens to their home countries. On each flight the personnel included a psychiatrist, and a male and female attendant, each of whom was experienced in caring for infirm persons.

The removal of these aliens from tax-supported hospitals and institutions within the United States will result in an annual savings of approximately \$800,000, and will provide space for United

States citizens and lawful resident aliens who are in need of hospitalization.

Unexecuted Orders. One of the major concerns of the Service is the number of orders of deportation that cannot be executed. Nearly one-fifth of these orders relate to aliens of the subversive, criminal, immoral, or narcotic classes.

More than half of the 10,874 unexecuted orders pending at the end of June related to cases involving travel document applications (1,693), private bills (1,313), institutions (1,776), section 243 (h) (815), and litigation (262). During the coming fiscal year all cases will be reviewed and appropriate action taken to reduce the number of such cases pending.

Travel Documents. The reluctance of foreign consuls to issue documents for nationals of their countries still constitutes the greatest single obstruction to effecting deportation.

Among the 1,693 cases mentioned above were 80 in which the charge of deportability was subversive and 423 other cases in which the charge was criminal, immoral, or narcotic, in which travel documents could not be obtained.

In the past, travel documents were requested from consuls very early in the proceedings. To save time, travel documents are not requested, now, in most cases until after the entry of a final order of deportation, or after a determination has been made that no further extension of time within which to depart will be given an alien who was granted voluntary departure with an alternate order of deportation. Since an application is made only when the need for a travel document has been ascertained, both the foreign consuls and this Service are saved from processing useless documents.

NATIONALITY

The outstanding achievement during the fiscal year 1956 in nationality matters was the placement and maintenance of naturalization activities on a current basis. At the end of the year there were no substantial arrearages in any of the districts of the Service.

The elimination of arrearages was probably the chief reason for the reduction in persons naturalized to 145,885 from a record high in fiscal 1955 of 209,526.

Declarations of Intention. The number of declarations of intention (12,870) filed was higher than in 1955 but was low when compared with 111,461 filed in fiscal year 1952, the last year that a

declaration was a prerequisite for naturalization. Only persons who have some need for a "first paper" to obtain employment or for other similar reasons now make applications for "first papers."

Applications for Naturalization. Although the 169,639 applications for naturalization received was 20 percent less than last year, receipts were 15 percent higher in the last half of the year, indicating an upward trend.

During the fiscal year, arrearages in applications for naturalization were kept below 29,000. On June 30, 1956, there were 22,884 applications for naturalization pending, in contrast with 87,420 such applications pending two years ago when a drive to eliminate arrearages began.

Greater efficiency through revision of policies, procedures, and organization made it possible to maintain a current status. Some of the changes follow:

A new deposition procedure was put into effect whereby the petitioner himself insures that the testimony of his witnesses is taken before a notary public and forwarded. Lack of depositions frequently had been a major reason for the continuance of naturalization petitions.

Applications for certificates of citizenship may be closed when an applicant fails to prosecute within the reasonable time of 30 days.

A one year period, rather than two, for reexamination was provided, during which the petitioner for naturalization has four opportunities to demonstrate the required knowledge and understanding.

A special effort has been made to reduce the number of petitions for naturalization pending in the courts and to present petitions to the courts as soon as possible after filing. The great majority of such petitions are heard by the courts shortly after filing, and those which remain in a pending status for longer periods are those which require additional action, such as completion of depositions of witnesses or conducting special investigations. Often, infrequency of court hearings delays final disposition of cases.

The success of these changes is demonstrated by the fact that in most areas a petition for naturalization may be filed within a period from 30 to 45 days after receipt of an application.

Naturalization Courts. For a number of years the Service has sought to concentrate the filing of naturalization petitions in the larger courts, because more frequent court sessions expedite the

processing of naturalization proceedings and promote economy and efficiency. With larger hearings and fewer courts, it is also possible to hold more impressive ceremonies that add new dignity and deeper significance to the occasions.

Progress with the program has been made through the cooperation of the judges of the various courts, and filings have been discontinued in a particular court only with the consent of the court. Under the program the number of courts exercising naturalization jurisdiction has been reduced from the approximately 950 reported last year to 795.

Naturalization. A comparison of the 1956 figure of 145,885 naturalizations with the 209,526 in fiscal 1955 is distorted by the fact that the 1955 figure was abnormally high as the result of special drives made during the year to reduce arrearages and expedite naturalizations. The 1956 figure on naturalizations was 24 percent higher than 1954 and 58 percent above the naturalization figure in 1953.

Eighty percent of the naturalizations in the fiscal year 1956 were under the general provisions of the naturalization laws, 12 percent under the provisions relating to spouses of United States citizens, and 5 percent relating to military naturalizations. Among the new citizens were former nationals of Poland (17,256), Germany (16,230), British Empire (13,600), Canada (11,539), and Italy (9,549).

Naturalization this past year, as always, had its share of human interest stories:

On February 6, 1956, Dr. Leslie Cheng, together with his wife and two children, was admitted by the United States District Court, Kansas City, Kansas. He had been at one time consultant to the personal physician to General Chiang Kai-shek of China.

In April 1956, Tomida Morimota Breeze was naturalized at River Falls, Wisconsin. She is a survivor of the atomic bomb at Hiroshima in 1945 and came to the United States as the wife of a United States Army veteran.

Naturalization of Members of Armed Forces. Public Law 86, which provided for the naturalization of persons in the armed forces of the United States after June 24, 1950, and prior to July 2, 1955, expired on December 31, 1955. The various branches of the armed forces cooperated by alerting all prospective applicants regarding the expiration date, and special action was taken by

this Service to complete the processing of the cases or to allow the applicants to file petitions for naturalization up to 12 midnight on December 31.

6,554 persons were naturalized under this Act during the year, including 2,236 outside the United States. While the Act was in effect a total of 30,552 were naturalized, 7,756 receiving their United States citizenship in proceedings conducted by Service representatives in the Azores, Austria, England, France, Germany, Italy, Africa, Korea, Okinawa, Newfoundland, and the Canal Zone.

Repatriations. During the year 798 persons who had lost their United States citizenship reacquired citizenship by repatriation. The majority of these persons were native-born women who lost citizenship through marriage to aliens and who were repatriated under the Act of June 25, 1936, as amended. For example, Lydia Lorrance, a 75-year-old widow, native of the United States, was repatriated, thereby regaining the citizenship which she lost upon marriage in 1912 to an alien husband. This petitioner had ancestors who fought in the Civil and Revolutionary Wars.

Derivative Citizenship. The practice of suggesting to parents that they obtain certificates of citizenship for children who derive citizenship through the parents' naturalization has continued. During this fiscal year there was a total of 30,728 applications for certificates of citizenship filed. 20,264 certificates were issued to persons who derived citizenship through naturalization of their parents. In addition, 7,748 certificates were issued to persons who were born abroad to United States citizens and thereby acquired citizenship at birth.

Citizenship Services. Under law this Service assists in promoting instruction and training in citizenship responsibilities of applicants for naturalization. Under this program, the names of newly arrived immigrants are furnished to school authorities by the Service, since these immigrants are potential candidates for naturalization. The names are furnished as a part of the promotion of citizenship education. During the past fiscal year, 217,519 names were referred to the public schools, 45,426 persons attended citizenship classes, and 5,872 persons enrolled for home study courses sponsored by many State colleges and universities.

The Federal Textbook on Citizenship for the use of candidates for naturalization is furnished free to public schools. This textbook, prepared in several parts, meets the different educational levels of individual candidates. Schools last year received 122,809

copies of the various parts of the textbook, which are distributed by the various offices of the Service. Persons not qualified for a free copy may buy one from the Government Printing Office.

Petitions Denied. During the year, there were 9,189 naturalization investigations completed, including 999 investigations in naturalization cases involving subversive persons.

As a result, 163 petitions were denied because the petitioner failed to establish good moral character, and 8 because there was lack of attachment to the principles of the Constitution of the United States. Of the 3,935 petitions denied during the year, the chief grounds for denial were, as in the past, withdrawal of the petition by petitioner and lack of prosecution.

Revocation and Expatriation. The citizenship of 288 persons was revoked. The majority of these cases were initiated by the Foreign Service of the Department of State on the ground that the naturalized persons became residents of a foreign state within five years after naturalization. However, some cases are initiated because naturalization was obtained through fraud.

District Court orders were entered revoking the naturalization of Rebecca Maisenberg, a high level communist in Detroit, and Leo Fisher, who had been active in Chicago as a Communist Party officer and teacher. The citizenship of Michael Li Mandri, a Los Angeles racketeer and international narcotics suspect, was revoked through judicial proceedings.

The Supreme Court passed upon two controversial questions involving revocation of naturalization during the year. In $U.S.\ v.$ $Minker, 350\ U.S.\ 179$, it held that the 1952 Act did not authorize the Service under its subpoena power to obtain evidence from a naturalized citizen in an investigation directed toward that individual's denaturalization. This interpretation results in clothing the naturalized person with the same protection granted by the Constitution to one accused of crime, despite the fact that denaturalization has always been held to be a civil, and not a criminal, proceeding.

In the other case, *U.S. v. Zucca*, 351 U.S. 91, the Court ruled that an affidavit of cause is a procedural prerequisite to the institution of revocation proceedings.

With earlier decisions requiring that evidence to revoke must be clear, unequivocal and convincing, these decisions increase the already heavy burden upon the Government when it moves to denaturalize, even in apparently flagrant cases.

A total of 4,987 persons lost citizenship through expatriation. Voting in a foregn political election or plebiscite, residence in a foreign state, and naturalization in a foreign state were the principal grounds for expatriation.

LEGISLATION AND LITIGATION

During the fiscal year 1956, six bills affecting laws administered by the Service were enacted into law. Three were passed during the First Session and three during the Second Session of the Eighty-Fourth Congress.

Public Law 149, approved July 12, 1955, extends for two years or until June 30, 1957, the authority for enlistment of aliens in the Regular Army authorized by the Act of June 30, 1950, as amended by Title II of the Act of June 19, 1951, and section 402(e) of the Immigration and Nationality Act. These statutes authorize the enlistment of not to exceed 12,500 aliens in the Regular Army. Such enlisted aliens are entitled to certain benefits if they apply for naturalization after completion of five or more years in military service.

Public Law 165, the "Atomic Weapons Rewards Act of 1955," approved July 15, 1955, authorizes awards to persons furnishing original information to the United States concerning atomic weapons and nuclear material which has been introduced, manufactured, or acquired in the United States contrary to law. Section 4 of the Act provides that if such information leading to an award is furnished by an alien, the Secretary of State, the Attorney General, and the Director of Central Intelligence, acting jointly, may determine that the entry of such alien into the United States is in the public interest and, in that event, such alien and the members of his immediate family may receive immigrant visas and be admitted for permanent residence, notwithstanding the requirements of the Immigration and Nationality Act.

Public Law 319, approved August 9, 1955, amends Title V of the Agricultural Act of 1949, as amended. The new statute extends for three and a half years, or until June 30, 1959, the authority for the recruitment and importation of Mexican agricultural laborers. The Act also provides for the relief of employers from liability to the United States for workers' transportation and subsistence costs when such costs have once been paid or provided to the workers by the employers. The amended Act also requires consultation by the Secretary of Labor with agricultural employers

and workers for the purpose of obtaining facts relevant to the supply of domestic farm workers and the wages paid such workers engaged in similar employment.

Public Law 430, approved March 16, 1956, grants the benefits of section 301(a) (7) of the Immigration and Nationality Act to certain children of United States citizens. It extends the provisions of that section to all cases involving children born to one alien parent and to one parent who is a citizen of this country who served in the armed forces of the United States after December 31, 1946, and before December 24, 1952, if the child was born outside of the United States and its outlying possessions after January 12, 1941, and before December 24, 1952, and if the child's case does not come within the provisions of section 201(g) or (i) of the Nationality Act of 1940.

Public Law 528, approved May 18, 1956, amends the Act entitled "An Act to provide better facilities for the enforcement of the customs and immigration laws," to increase the amounts authorized to be expended. The law amends the Act of June 26, 1930, as amended, by increasing the limit which may be expended by one department for one project from \$15,000 to \$30,000, and increases the limit for the joint use of the Customs and the Immigration and Naturalization Service from \$30,000 to \$60,000.

Public Law 555, approved June 4, 1956, amends the United States Information and Educational Exchange Act of 1948, as amended. It requires a person who is admitted to the United States as an exchange visitor, or who acquired that status after admission, to return to a cooperating country and to reside there for a total of two years before he becomes eligible for an immigrant visa or for a nonimmigrant visa under section 101(a) (15) (H) of the Immigration and Nationality Act. The Attorney General is authorized to waive the two-year foreign residence requirement under some circumstances. This amendment, by its own terms, applies only to persons acquiring exchange visitor status after the enactment of the amendment.

Soon after the close of fiscal year 1956, acts were approved affecting the Service. *Public Law 728* was approved on July 18, 1956. This law, known as "The Narcotic Control Act of 1956," contains provisions adding conviction of "conspiracy" to violate narcotics laws and conviction of "illicit possession" of narcotics as grounds for exclusion or deportation of narcotic law violators. It further provides that section 241(b) of the Immigration and Nationality

Act does not apply to aliens charged with deportability under section 241(a) (11) of that Act.

Public Law 880, approved August 1, 1956, known as the "Social Security Amendments of 1956," contains provisions directing that monthly social security benefits shall not be paid to aliens outside the United States for designated continuous periods of time, with some exceptions based on reciprocity. The Attorney General is required to certify to the Secretary of Health, Education and Welfare such information regarding aliens who depart from the United States to any foreign country (other than foreign contiguous territory) as may be necessary to enable the Secretary to carry out the purposes of this portion of the Act. He is also required to assist the Secretary in obtaining such other information as may be needed by the Secretary.

Private Legislation. Service functions relative to private immigration bills include the timely submission of investigative reports to Congress on these bills, the prompt completion of all administrative procedures during the pendency of private legislation, and, following disposition by Congress, summary enforcement of departures or effectuation of the terms of the bill. The effectiveness of the program has been immeasurably improved by instituting inter-agency conferences to improve policy coordination between the interested agencies.

In fiscal 1956, there were 1,474 private immigration bills introduced in Congress. The Judiciary Committees were furnished comprehensive reports in 1,421 cases. During this period, 573 bills were enacted into private laws, and 725 bills were adversely acted upon by the House and Senate Judiciary Committees. The reinstitution of preexamination made such adverse action possible in more than 500 of these cases and obviated the necessity for countless future bills. As of June 30, 1956, there were 2,492 bills still pending, which had received no final action in the Congress.

A comprehensive analysis of private immigration legislation in the first session of the 84th Congress resulted in proposals that led to the introduction of public bills which would provide administrative relief for deserving aliens who now have no recourse other than through private legislation. More than 85 percent of the private immigration bills enacted during the past year would have been unnecessary, had these proposals been law.

Litigation. Aliens found deportable through administrative process continued in large numbers to besiege the courts with suits

attacking the deportation statutes on a wide variety of grounds. The denial of suspension of deportation, voluntary departure, adjustment of status, and similar forms of administrative relief formed the basis for another large number of suits filed by deportable aliens. Many cases involved revocation of naturalization, which, in many instances, opens the door to deportation proceedings.

While the Service is not disposed to deny any alien the full right of review to which he is entitled, it is a fact that litigation of this type is often without merit and serves only to further delay the alien's deportation. One of the questions of vital importance in the administration of the deportation laws now pending before the Supreme Court is the validity of section 241(d) of the 1952 Act making certain offenses grounds for deportation irrespective of the date of commission or of the date of the alien's entry, considered in connection with the savings clause of section 405.

Thirty-three cases directly involving laws administered by the Service were calendared by the Supreme Court during the year, including eleven carried over from the preceding term. Certiorari was denied by the court in 18 cases. Nine decisions were rendered, two favorable and seven adverse to the Government. In two other cases the lower court's judgments were vacated for mootness. Four cases had not been reached when the court adjourned and will be placed on the 1956-1957 calendar. Certiorari has been granted in three of these cases.

Prosecutions. Cases involving 3,369 immigration law violations were instituted during the year, only a third of the cases instituted in the previous year. These cases resulted in 3,246 convictions, with aggregate imprisonment of 1,391 years and fines totaling \$37,072.

The decrease was in prosecutions for illegal entry, and is directly attributable to the successful control maintained on the Mexican Border.

Convictions were obtained in 216 smuggling cases involving 890 smuggled aliens. Fines totaling \$14,775 were imposed and imprisonment aggregated 226 years.

Of the 556 prosecutions instituted for nationality violations, convictions were obtained in 378 cases. All but ten of these convictions involved aliens who falsely represented themselves as citizens of the United States.

INTERNAL MANAGEMENT

The vast improvement in the Mexican Border control, the new detention policy, the order to show cause procedure, the naturalization drive last year, all were contributing factors that brought about the gratifying result of a current or near current status in every phase of immigration and nationality work during the past fiscal year.

Continuous appraisal of the work and organization of the Service indicated that the decentralized organization plan installed in January 1955 could be further extended by designating additional suboffices as district offices. On April 6, 1956, 21 additional offices became district offices. The immediate effect was broader decision-making authority, which meant that immigration and nationality applications could be handled more expeditiously; shortened lines of supervision with the regional offices, and better supervision of the smaller geographic areas by district offices were other results of the reorganization.

Field Inspection. With a decentralized organization it is important that continuous efforts be made to see that procedures and regulations are interpreted and carried out in a uniform manner throughout the Service.

Field Inspection Officers inspected 107 offices during the fiscal year 1956. Deficiencies observed and other matters requiring attention were reported to the Commissioner and his staff for remedial measures. This program of continual inspections is contributing effectively in progressive over-all improvement toward increased efficiency and greater consistency in operations, supervision, and administrative management.

One of the several special projects assigned to the Field Inspection Officers was in connection with a request by the Department of State that this Service ascertain by personal contact with officials of State penal institutions, the names of Chinese nationals serving prison sentences, and the feasibility of permitting release of such prisoners by parole or commutation of sentence, if their release was requested for deportation or voluntary departure. The data were to be used in facilitating negotiations at Geneva with the China Communist Government for release of American citizens now imprisoned on the Chinese mainland. This operation has continued at the request of the Department of State, giving physical control and required contacts to the Field Inspection Officers until active release of United States citizens.

Security. Work was completed during the fiscal year 1956 on the granting of formal clearance for access to classified information to all Service employees whose duties require such access. Improvements were made in security practices in various offices.

ADMINISTRATION

During the fiscal year, emphasis was directed toward a more efficient and economic operation throughout the Service.

Personnel. Major emphasis was placed upon in-Service promotion during the year. Senior and junior selection boards evaluated the training and experience of officers and established rosters of Service employees recommended for promotion. Within this framework more than 500 promotions were made.

Training. Training programs included the initial training of 671 officers who graduated from the Border Patrol Academy after eight weeks spent on Spanish, law, fingerprinting, intelligence, and enforcement methods. In the advanced Officers Training School, 200 career officers attended six-weeks courses designed to broaden their knowledge, sharpen capacity for independent judgment, and to qualify officers for advancement to supervisory positions.

Finance. The fiscal year 1956 was devoted to evaluating the previous year's decentralization of accounting and procurement functions. As a result, fiscal operations were more completely standardized through formulation and revision of accounting and procurement instructions.

Space Allocation and Construction. The Central Office was moved from a temporary structure to a modern building in September 1955. Decentralization made it possible to reduce from 125,000 to 60,000 square feet the amount of space needed for the Central Office.

After numerous conferences with the Bureau of the Budget, General Services, the Customs Bureau, and other agencies, preliminary plans have been developed for a number of proposed buildings, including inspection stations (particularly along the northern border), and Border Patrol stations and sector headquarters.

Reports and Forms Control. Under the reports and forms control procedures, reporting directives have been simplified, and a number of reports have been eliminated or are submitted less frequently. Progress has been made by the Central and Regional Of-

fices in consolidating district forms into regional or Service-wide forms.

Information and Records. The Service completed the microfilming of manifests and other documents for all arrivals prior to December 1, 1954, with resultant savings of more than 10,000 square feet of space. A files inventory taken during the year was used to purge indexes in the eleven original files control offices, and to bring an index card for each active case file into the Central Office file.

Statistics. Included in the statistics work during fiscal year 1956 were formulas established to insure consistent personnel assignments in relation to workloads; a study on the agricultural labor program; calculations for new quotas in connection with the introduction in Congress of several Administration-sponsored bills; and analyses of deportation charges, Chinese immigration, and the migration of the alien population.

TABLE 1. IMMIGRATION TO THE UNITED STATES: 1820 - 1956

From 1820 to 1867 figures represent allen passengers arrived; 1868 to 1891 inclusive and 1895 to 1897 inclusive immigrant allens arrived; 1892 to 1894 inclusive and from 1898 to the present time immigrant allens admitted.

⁽¹⁾ An immigrant is defined in statistics of the Service as an allen admitted for permanent residence, or as an addition to the population. A nonimmigrant is defined as an allen admitted for temporary residence. Returning resident aliens who have once been counted as immigrants are included with nonimmigrants, although the immigration laws define such aliens as immigrants.

⁽²⁾ Refugees admitted under the Refugee Relief Act of 1953.

⁽³⁾ Does not include agricultural laborers admitted under Section 101(a) (15) (H), Immigration and Nationality Act, of whom there were 7,946 in 1954, 13,195 in 1955, and 15,152 in 1956.

TABLE 4. IMMIGRATION BY COUNTRY, FOR DECADES: 1820 TO 1956¹

(From 1820 to 1867 figures represent alien passengers arrived; 1868 to 1891 inclusive and 1895 to 1897 inclusive immigrant aliens arrived; 1892 to 1894 inclusive and from 1898 to present time immigrant aliens admitted. Data for years prior to 1906 relate to country whence alien came; thereafter to country of last permanent residence. Because of changes in boundaries and changes in lists of countries, data for certain countries are not comparable throughout.)

(1) Data are for fiscal years ended June 30, except 1820 to 1831 inclusive and 1844 to 1849 inclusive fiscal years ended September 30; 1833 to 1842 inclusive and 1851 to 1867 inclusive years ended December 31; 1832 covers 15 months ended December 31; 1843 nine months ended September 30; 1850 fifteen months ended December 31 and 1868 six months ended June 30.

(2) Data for Austria-Hungary were not reported until 1861. Austria and Hungary have been recorded separately since 1905. In the years 1938 to 1945 inclusive Austria was included with Germany.

(3) United Kingdom not specified. In the years 1901 to 1951, included in other Europe.
 (4) From 1820 to 1868 the figures for Norway and Sweden were combined.

(5) Poland was recorded as a separate country from 1820 to 1898 and since 1920. Between 1899 and

(a) Found was included with Austria-Hungary, Germany, and Russia.
(b) Since 1931 the Russian Empire has been broken down into European U. S. S. R. and Siberla or Asiatic U. S. S. R.
(7) No record of immigration from Japan until 1861.
(8) No record of immigration from Turkey in Asia until 1869.
(9) Prior to 1000 Compete and Newfoundard was recorded as Prificial Newton America. From 1800.

(9) Prior to 1920 Canada and Newfoundland were recorded as British North America. From 1820 to 1898 the figures include all British North American possessions.

No record of immigration from Mexico from 1886 to 1893

- (11) Bulgaria, Serbia, and Montenegro were first reported in 1899. Bulgaria has been reported separately since 1920 and in 1920 also a separate enumeration was made for the Kingdom of Serbs, Croats, and Slovenes. Since 1922 the Serb, Croat, and Slovene Kingdom has been recorded as Yugoslavia.
- 1 ugoslavia.

 (12) Countries added to the list since the beginning of World War I are theretofore included with the countries to which they belonged. Figures are available since 1920 for Czechoslovakia and Finland; and since 1924 for Albania, Estonia, Latvia, and Lithuania.

 (13) No record of immigration from Rumania until 1880.

 (14) The figure 33,523 in column headed 1901-1910, includes 32,897 persons returning in 1906 to their homes in the United States.

(15) Beginning with the year 1952, Asia includes the Philippines. From 1934 to 1951 the Philippines were included in the Pacific Islands. Prior to 1934 the Philippines were recorded in separate tables as insular travel.

(16) Included with countries not specified prior to 1925. (17) Figures for Luxembourg are available since 1925.
